# INCREASE PROFITS WITH WARRCLOUD

WarrCloud has been one of the BEST Partners that I've had over my 40-year career. But here's why - It's like an extension of my dealership, it's like having somebody on the team that I know genuinely cares about the schedules, getting paid and everything going smoothly. So, if you're considering your warranty process, which I highly recommend because I have done it both ways in my 40 year career - WarrCloud is definitely the company to use!

**- David Long, Hansel Auto Group**

WarrCloud is the future of warranty processing - it reduces our claims expense and frees up our people to focus on the customer. We have it in most of our stores - highly recommended.

**- Justin Pomeroy, Foundation Auto Group**

Within the first month of working with WarrCloud, our DAS score increased substantially. I don't have to get my hands on every single claim like I did before. I don't have to fix things after the fact. Now, I work well with my rep. She's super responsive and she accommodates my preferred communication method. My numbers match up, first time submission rate is up, and now we're in the green and getting close to the blue! My office manager is happy, and so is my owner."

**- Steve Bastian, Service Manager, Summit Ford**
